

(Singapore) We went back to school in the start of the new year. Aver Asia was the Event Anchor at ITE College West on 10 Jan 2018, alongside with SPF, SCDF, IPAF, SISO and many other key players of Workplace Safety & Health.

Our Trainers worked tirelessly for the entire day; and always carrying a smile. They were well-rewarded by the excited and happy faces from the ITE students. The trainers provided basic MEWP training to the ITE students, but most importantly, inspired the future mechanics and engineers for our industry. We know for sure *that today we lift them up, tomorrow they are going to be our support pillars.*

The rain went on and on for that day; however, it did not dampen our youths, and some young-at-heart lecturers, to get onto our boom lifts, aerial work platforms and scissor lifts.
